

SECATEURS INFORMATION

*All secateurs are designed to be used for cutting up to a maximum of 15mm thick branches.

*You should never cut dry branches which will cause the damage of both the blade and branches.

All secateurs should be used for only cutting living branches.

*When you cut the branch, please cut in angle and do not twist the blade while cutting.

*Please dry properly after use and put some oil around attached screw for preventing from rust.

*If you want to sharpen secateurs by yourself please use whetstone. Stones come in a variety of grades, from rough (low number of grits) to ultra-fine (high number of grits).

1000 grit for ordinary sharpening.

3000 grit for polishing.

If you have any further question. please do not hesitate to contact us.
